This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Artemis UK Select Fund (the “fund”)

The fund is managed by Artemis Fund Managers Limited.

ISIN:	GB00B2PLJG05
Class:	Class I accumulation units, GBP

This key investor information document is accurate as at 15 February 2024.

OBJECTIVES AND INVESTMENT POLICY

Objective

To grow capital over a five year period.

Investment policy

What the fund invests in

- 80% to 100% in company shares.
- Up to 20% in bonds, cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.

Use of derivatives

The fund may use derivatives:

- for investment purposes to achieve the fund objective, including by taking long and short positions
- to produce additional income or growth
- for efficient portfolio management purposes to reduce risk and manage the fund efficiently.

Where the fund invests

- United Kingdom, including companies in other countries that are headquartered or have a significant part of their activities in the United Kingdom.

Industries the fund invests in

- Any

Other limitations specific to this fund

- Total short exposures to equity derivatives will not exceed 10% of the fund.

Investment strategy

- The fund is actively managed.
- The manager generates ideas from a number of sources of information, detailed financial analysis and wider economic analysis. A systematic approach is used to collect, assess, and cross-reference this information.
- A company's valuation relative to the industry in which it operates is also considered.
- While considering factors which are unique to a company, the manager seeks companies whose valuations are overly conservative in relation to their peers and that provide attractive opportunities for a future upgrade.
- Short positions can be taken where stock-specific insight identifies an over-valued company.

Benchmarks

FTSE All-Share Index TR

A widely-used indicator of the performance of the UK stockmarket, in which the fund invests. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

IA UK All Companies NR

A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

Other information

Dealing frequency: Normally Monday to Friday except UK public holidays and non-dealing days. Visit www.artemisfunds.com/non-dealing-days for more information. Instructions received before 12 noon UK time will be processed at 12 noon on the same day.

Distribution policy: This is an accumulation class. Income received is reinvested in the value of the fund.

RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.

- The risk category has been calculated using historic data and may not be a reliable indicator of the fund's future risk profile.

- A risk indicator of "1" does not mean that the investment is "risk free".

Risk indicator number is accurate as at: 31 December 2023.

The risk indicator may not fully take into account the following risks and the following may affect fund performance:

Market volatility risk: The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

Currency risk: The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value

Concentration risk: The fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.

Charges from capital risk: Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.

Derivatives risk: The fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the fund value will reduce.

Leverage risk: The fund may operate with a significant amount of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. A leveraged portfolio may result in large fluctuations in its value and therefore entails a high degree of risk including the risk that losses may be substantial.

Please refer to the fund's prospectus for full details of these and other risks which are applicable to this fund.

CHARGES FOR THE FUND

One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Barings Global Resources Fund (the "Fund") a sub-fund of Barings Global Umbrella Fund (the "Umbrella Fund") Class I GBP Acc - ISIN No. IE00B4V6GM81 (the "Unit Class")

The Fund is a Unit Trust. Baring International Fund Managers (Ireland) Limited is the Manager of the Fund.

OBJECTIVE AND INVESTMENT POLICY

Objective: To provide long-term capital growth by investing in securities of commodity producers from anywhere in the world.

Investment Policy: The Fund invests at least 70% of its total assets (excluding cash and cash-equivalent assets) in securities (principally shares) of companies anywhere in the world whose main business is the extraction, production, processing and/or trading of commodities, such as, oil, gold, aluminium, coffee and sugar. The Fund will invest at least 50% of the Fund's total assets in equities of companies that exhibit positive or improving environmental, social and governance (ESG) characteristics.

The Fund may use derivative instruments for both investment and hedging purposes. The return on a derivative is linked to movements in an underlying instrument referenced by the derivative such as currency or interest rates. The base currency of the Fund is USD.

Unit Class Currency Hedging: This Unit Class is not hedged. Therefore the performance of this Unit Class will be impacted by foreign exchange rate fluctuations between the Unit Class currency and the base currency of the Fund.

Distribution Policy: N/A - Income will be rolled up into the value of your investment.

Dealing Frequency: Daily. Investors can buy and sell their Units on demand on each Business Day (as defined in the Prospectus).

Benchmark: Free-float MSCI All Country World Energy/Materials (Total Net Return) Index. The Fund is actively managed and is not designed to track the Benchmark so its performance may deviate materially from the Benchmark. The investment manager has complete discretion in making investments and is not constrained by the Benchmark. The Fund may invest significantly in instruments which are not included in the Benchmark. The Benchmark is used only for risk management and performance comparison purposes. The investment manager may consider, for example, issuer exposures, sector weights, country weights and tracking error in each case relative to the Benchmark but does not use the Benchmark as an investment limitation.

For further details please refer to the Prospectus and Supplement.

RISK AND REWARD PROFILE

The risk number is based on the rate at which the value of the simulated data of the Fund has moved up and down in the past, and is an indicator of absolute risk.

- Historical and simulated data may not be a reliable indicator for the future
- The Fund's ranking is not guaranteed and may change over time
- The lowest risk category does not mean the investment is risk free
- The Fund is categorised as a 6 for the purposes of this table due to the nature of its investments
- The value of investments and the income may go down as well as up and investors may not get back the amount they invest

The following risks may not be captured by the risk and reward indicator:

- During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments readily which could affect the Fund's ability to meet investors' redemption requests

Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.

- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.
- Investments in equities may be subject to significant fluctuations in value
- There are greater risks investing in emerging markets than in developed markets due to economic, political or structural challenges and the Fund may be required to establish special custody arrangements in certain markets before investing.
- The Fund can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently, in small volumes and their share prices may fluctuate more than those of larger companies.
- A more complete description of the risk factors is set out in the Prospectus under "Risk Considerations" and in the Supplement for the Fund.

BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Global Income Fund

INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B7S9KM94)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To achieve income over an annual period together with capital growth over the long term (5 years or more).

POLICY

The Fund will:

- invest anywhere in the world;
- invest at least 75% of the portfolio in global equities (company shares), including ordinary shares, preference shares and other equity-related securities; and
- typically invest in company shares that, at time of purchase, are paying a higher yield than the Benchmark and will sell company shares if their yield consistently drops below the yield of the Benchmark.

The Fund may:

- invest in emerging markets;
- invest in money market instruments, deposits, cash and near cash;
- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income; and
- invest up to 10% in other collective investment schemes.

Benchmark: The Fund uses the FTSE World TR Index (the "Benchmark") as a reference index as it is broadly representative of the investment universe, and it forms the basis of the Fund's income objective which is a part of the Fund's overall objective. The Fund's performance is measured against the Benchmark. However, due to the Fund's minimum yield thresholds, performance may differ and, in certain conditions, underperform the Benchmark.

The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the investment weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

OTHER INFORMATION

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 5 because its historical value has shown moderately high volatility. With a Fund rating of 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.

Concentration Risk: A fall in the value of a single investment may have a significant impact on the value of the Fund because it typically invests in a limited number of investments.

Charges to Capital: The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.

High Yield companies risk: Companies with high-dividend rates are at a greater risk of not being able to meet these payments and are more sensitive to interest rate risk.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Charges

The charges cover the costs of running the Fund, including the costs of marketing and selling. These charges reduce the potential growth of your investment.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST

Entry charge	0.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

CHARGES TAKEN FROM THE FUND OVER A YEAR

Ongoing charge*	0.82%
-----------------	-------

CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS

Performance fee	None
-----------------	------

The ongoing charge is based on expenses calculated on 31 December 2023. This may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid when buying or selling units in another investment fund.

*It should be noted that the ongoing charge figure shown includes ongoing charges in respect of other open-ended investment funds but excludes ongoing charges from closed-ended funds held. The ongoing charges from closed-ended funds held were 0.00% as at 31 December 2023.

More information about charges is available in the "Fees and Expenses" section of the Prospectus.

Past Performance

The chart includes all charges except entry charges.

Fund launch date - 30 November 2005.

Share class launch date - 4 September 2012.

Performance of this share class is shown in GBP.

Performance of the Benchmark is shown in GBP.

Past performance is not a guide to future performance.

The chart shows the Fund's performance for each full calendar year against the Benchmark.

Practical Information

Legal Status: The Fund is a sub-fund (part) of BNY Mellon Investment Funds ("BNY MIF"), an umbrella structure comprising different sub-funds. The assets of the Fund belong exclusively to that sub-fund and may not be used to discharge the liabilities of or claims against any other person or body, including BNY MIF or any other sub-fund within the umbrella.

Documents: Copies of the Prospectus, annual and semi-annual reports which are prepared for the umbrella may be obtained free of charge from www.bnymellonim.com or from BNY Mellon Investment Management EMEA Limited, BNY Mellon Centre, 160 Queen Victoria Street, London EC4V 4LA. These documents are available in English.

Share price: The latest share price and other information, including how to buy or sell shares, are available from the website and address given above. Other share classes are offered by the Fund as set out in the Prospectus.

Switching: Investors may switch shares in the Fund for shares in other sub-funds of BNY MIF provided they satisfy the criteria applicable to investment in other sub-funds. Further information on switching is contained in the "Switching" section of the Prospectus.

Liability statement: BNY Mellon Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.

Depository: NatWest Trustee and Depository Services Limited.

Tax: The tax legislation of the Fund's domicile may have an impact on your personal tax position. For further details, please speak to an adviser.

Remuneration Policy: Details of the up-to-date remuneration policy of BNY Mellon Fund Managers Limited including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits are available on www.bnymellonim.com. A paper copy will be made available free of charge upon request.

Index Providers: Further information about the index providers is set out under 'Benchmark Provider Disclaimers' in the Prospectus.

Brown Advisory Global Leaders Fund Dollar Class C Acc

ISIN: IE00BVVHP670

Global Leaders Fund (“the **Fund**”) is an actively managed sub-fund of Brown Advisory Funds plc (“the **Company**”). The Company is managed by Brown Advisory (Ireland) Limited (“the **Manager**”), part of the Brown Advisory group of companies.

Objectives and Investment Policy

Objectives

The objective of the Fund is to achieve capital appreciation by investing primarily in global equities.

Investment Policy

The Fund will under normal market conditions: (1) invest at least 40% of its net assets outside the United States (including Emerging Market Countries) which may be reduced to 30% if market conditions are not favourable, and (2) hold securities of issuers located in at least three countries. The equity securities in which the Fund may invest include common stock, preferred stock, American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”) and the Fund may also invest in CIS (including, exchange traded funds (“ETFs”)) subject to the limits set out in the Prospectus. The equity securities in which the Fund may invest will be issued by mid- and large-capitalisation companies generally with market capitalizations above \$2 billion at the time of purchase that the Fund’s Investment Manager believes have strong, or improving, long-term business characteristics and share prices that do not reflect these favourable fundamental attributes.

The Sub-Investment Manager has determined that the Fund is an Article 8 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR).

In addition, the equity securities in which the Fund may invest will include the equity securities of companies that the Investment Manager believes are leaders within their industry or country as demonstrated by an ability to deliver high relative

return on invested capital over time. This typically can be attributable to, among other things, a strong competitive position and a defensible barrier to entry.

The Fund may invest in participatory notes (P-Notes) in order to gain exposure to securities and markets which may not be efficiently accessed through direct investment. The Fund may use put options on equity indices in order to seek to enhance returns, to attempt to hedge some of its investment risk, to manage portfolio duration or as a substitute position for holding the underlying asset on which the put option is based.

Benchmark

The Fund uses the MSCI ACWI Net Total Return USD Index as a Comparator Benchmark to compare performance. The Fund is actively managed and is not constrained by any benchmark.

Dealing Frequency

Investors may redeem shares on demand on any day (except Saturday or Sunday) on which the New York Stock Exchange is open.

Distribution Policy

The Fund does not intend to distribute income on your shares. The price of your shares shall rise by the net income earned per share.

For full investment policy details please refer to the Fund Supplement’s Investment Objective and Policies section.

Risk and Reward Profile

The risk and reward indicator

This indicator is based on historical data and may not be a reliable indication for the future risk profile of the Fund.

- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean your investment is risk free. The Fund’s investments are subject to normal market fluctuations and other risks inherent in equities.
- The Fund is in category 6 as it mostly invests in equities, which typically experience higher levels of price fluctuation than other types of instruments.
- For a more detailed explanation of these and other risk factors, please refer to the section entitled Risk Factors in the prospectus and supplement.

Other particular risks:

Operational risk: The Fund’s operations depend on third parties, including the Fund’s Administrator and Custodian, and the Fund may suffer disruption or loss in the event of their failure.

Equities Risk: equity investments are subject to greater fluctuation in market value than other asset classes as a result of such factors as a company’s business performance, investor perceptions, stock market trends and several economic conditions. This may cause the Fund’s share price to fluctuate.

Derivatives Risk: The Fund is permitted to use certain types of derivatives instruments to seek to protect its assets against some of the risks outlined in this section. Derivatives may fluctuate in value rapidly and may cause losses that are greater than the original amount paid for the relevant derivative. Please refer to the investment policy section of the prospectus for a full list of the types of derivative that the Fund may utilize.

Liquidity Risk: The Fund may invest in securities which may, due to negative market conditions, become difficult to sell or may need to be sold at an unfavourable price. This may affect the overall value of the Fund.

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date. The insolvency of any institution providing services such as the safekeeping of assets or acting as counterparty in respect of derivatives or other instruments may expose the Fund to financial loss.

Charges

One-off charges taken before or after you invest:

International Value Fund

Share Class: Accumulation (ISIN: GB0033772285)

a sub fund of Dimensional Funds ICVC. This Fund is managed by Dimensional Fund Advisors Ltd.

Objectives & Investment Policy

The aim is to increase the value of your investment and to earn income within the Fund.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.

The Fund primarily invests in shares of companies which are established in developed countries or which derive a majority their revenue from developed countries (excluding the United Kingdom), as well as depositary receipts of these companies (financial certificates representing the shares of these companies and which are bought and sold globally). The Fund invests using a value strategy, meaning it invests in shares of companies where, at the time of purchase, the Investment Manager believes that the share price is low compared to the accounting value of the company.

The composition of the Fund may be adjusted based on considerations such as the number of outstanding shares of public companies that are freely available to the investing public, the tendency of the price of a security/share to continue movement in a single direction, how readily available the shares are to buy and sell, liquidity management, size, value, profitability and investment characteristics.

The Fund may use financial contracts or instruments (derivatives) to

manage risk, reduce costs or improve returns.

Income is not distributed and is rolled up (accumulated) into the value of your investment.

You may sell your investment in the Fund on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund may invest up to 10% of its assets in other underlying funds. The Fund's performance, costs and risks will be affected by the underlying funds. There can be no assurance that an underlying fund will achieve its investment objective. The assets in which the Fund invests may be denominated in or have exposure to a currency other than the currency of the shares in the Fund or of the country in which you live. Additionally, the currency of the shares you hold may be denominated in a currency different to the base currency of the Fund. The Fund does not actively manage movements in the value of currencies and currency fluctuations may affect the value of the Fund's assets.

The Fund's investments are subject to issuer-specific risks, market risks, economic or political risks that may cause the share prices to fluctuate over time. This can affect the value of your investment in the Fund.

The Fund may seek to identify and invest in value shares, which are (in the Investment Manager's view) shares, the prices of which are low compared to the accounting values of the companies issuing them. Value shares may

perform differently from the market as a whole and following a value oriented investment strategy may cause the Fund, at times, to underperform funds that use other investment strategies.

Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charges	0.33%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser or distributor.

The ongoing charges figure shown here is an annualised estimate of the charges as there has been a reasonably significant difference to the last reported ongoing charges figure. The Fund's annual report for each financial year will include detail on the exact charges made. It excludes portfolio transaction costs and performance fees, if any.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

No conversion fee will be charged by the Fund or the investment manager.

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. Any one-off charges are excluded from the calculation of past performance.

The Fund was launched in 2004 and the share class was launched in 2004.

Past performance has been calculated in GBP.

Fidelity European Fund

a sub-fund of Fidelity Investment Funds

Fidelity European Fund W Accumulation Shares
(ISIN:GB00BFRT3504)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

Objective: The fund aims to increase the value of your investment over a period of 5 years or more and pay you a growing income.

Investment Policy: The fund will invest at least 80% in continental European companies. The companies will be either listed, incorporated, domiciled, or have significant business activities in the region. The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives.

Investment Process: The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI Europe ex UK Index. The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

Additional information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the MSCI Europe ex UK (Net total return) Index.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. The ongoing charges figure shown here for this new class is an estimate of the charges. This figure may vary from year to year. It excludes:
Entry charge	0.00%	
Exit charge	0.00%	
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.		
Charges taken from the fund over a year		For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.
Ongoing charges	0.91%	
Charges taken from the fund under certain specific conditions		
Performance fee	N/A	

Risk and Reward Profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment. The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 4 November 1985. This class was launched on 13 November 2013.

Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an "*" in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

Fundsmith Equity Fund

R Class Shares in Fundsmith Equity Fund

Accumulation Shares (ISIN: GB00B4LPDJ14)

Income Shares (ISIN: GB00B4QBRK32)

The fund is managed by Fundsmith LLP

Objectives and investment policy

The fund's objective is to achieve long-term (over 5 years) growth in value, investing in shares of companies on a global basis. The fund's approach is to be a long-term investor in its chosen stocks and it will not adopt short-term trading strategies. The fund aims to invest in businesses:

- that can sustain a high return on operating capital employed;
- whose advantages are difficult to replicate;
- which do not require significant borrowing to generate returns;
- with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- that are resilient to change, particularly technological innovation;
- whose valuation is considered to be attractive.

The fund will not invest in other funds, property or derivatives nor hedge any currency exposure. The fund will not borrow money, except in unusual circumstances. The fund is actively managed meaning that the fund manager uses their expertise to select investments to achieve the fund's objective. The fund does not track and is not managed by reference to any particular benchmark. The fund does not have any specific geographical or sector focus.

An investor, or prospective investor, may buy or sell their shares on demand each business day in the UK. Instructions to buy or sell received before noon will be implemented that day; instructions received after noon or on a non-business day will be implemented at noon on the next business day.

For the Accumulation Shares, the dividends are reinvested in the fund. For the Income Shares, the dividends are paid out to you from the fund.

Recommendation: This fund invests for the long-term (over 5 years) and may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The risk category reflects the significance of the fund's share price fluctuations based on historical data. Historical data may not be a reliable indication of the future risk profile of the fund. The risk category of the fund is not guaranteed and may change over time. Further, the lowest category of risk does not mean risk free. Your initial investment is not guaranteed.

Generally, the higher the risk category, the greater the potential for higher returns but also the higher the risk of losing money. This fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past. The underlying investments are, however, in large companies with shares that are, in most cases, highly liquid.

There are a number of other risks that are not covered by the indicator above. A full description is contained in the prospectus under the heading "Risk Factors". The most material are:

Currency risk: The fund's portfolio is a global share portfolio and many of the investments are not denominated in Sterling. There is no currency hedging in place and the price of shares in the fund may therefore rise or fall purely on account of exchange rate movements.

Concentration risk: The investment criteria adopted by the fund significantly limits the number of potential investments. The fund generally holds 20 to 30 stocks and so it is more concentrated than many other funds. This means that the performance of a single stock within the portfolio has a greater effect on the price of the shares of the fund.

Operational risk: Failures or delays in operational processes may negatively affect the fund. There is a risk that any company responsible for the safekeeping of the assets of the fund may fail to do so properly or may become insolvent, which could cause loss to the fund.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The charges for the fund are shown below. The ongoing charges figure is based on the fund's expenses for the year ended 31 December 2023. This includes all costs borne by the fund except for portfolio transaction costs but, because the portfolio turnover is relatively low, these charges should equally be low.

The ongoing charges are used to pay the costs of running the fund, including the fee payable to Fundsmith LLP, which is 1.50% per annum, and certain other costs including marketing and distributing the fund. These ongoing charges reduce the potential growth of the investment. The overall ongoing charges may vary from year to year.

One-off charges taken before or after you invest:

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year:

Ongoing charges	1.54%
-----------------	-------

Charges taken from the Fund under specific conditions:

Performance fee	NONE
-----------------	------

Past performance

You should be aware that past performance is not a guide to future performance.

Fund launch date: 19/10/2010

American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Income C
ISIN: GB00B80QG490

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to track the performance of the S&P 500 Index (the "Index") before the deduction of charges and tax.
- The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
- The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.10%.

Use of derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is distributed.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2023. Charges may vary from year to year.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The performance of the Fund is shown against the performance of the S&P 500 Index.
- The Fund was launched on 31 October 1988.

Invesco Asian Fund (UK) (the "Fund")

A fund of Invesco Far Eastern Investment Series (the "Company")

Z Accumulation share class (ISIN: GB00B8N44Q86) (the "Share Class")

The Fund is managed by Invesco Fund Managers Limited, part of the Invesco Group.

Objectives and Investment Policy

- The objective of the Fund is to achieve long-term (5 years plus) capital growth.
- The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in Asia and Australasia, excluding Japan.
- The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Fund has an active investment approach based on stock selection driven by the fund manager's assessment of valuation. The Fund is not constrained by a benchmark and has a flexible approach with no inbuilt bias to country, sector or company size.
- The reference to (UK) in the Fund's name only relates to the Fund's domicile and is unrelated to the Fund's objective and investment policy.
- You can buy, sell and switch shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.
- Recommendation: The Fund may not be appropriate if you plan to withdraw your money within 5 years.

Risk and Reward Profile

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and you may not get back the full amount invested. Over time, inflation may erode the value of investments.
- The Fund invests in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.
- The Fund may use Stock Connect to access China A Shares traded in mainland China. This may result in additional liquidity risk and operational risks including settlement and default risks, regulatory risk and system failure risk.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.
- The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.
- A more detailed description of risk factors that apply to this Fund is set out in Section 29 of the Prospectus.

Charges

**iShares Edge MSCI World Quality Factor
UCITS ETF**

A sub-fund of iShares IV plc

USD (Acc) Share Class

ISIN: IE00BP3QZ601

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI World Sector Neutral Quality Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund is passively managed and invests in equity securities (e.g. shares) that, so far as possible and practicable, make up the Index.
- ▶ The Index aims to reflect the performance characteristics of a subset of equity securities within the MSCI World Index (Parent Index) which are selected for their high quality. The constituents of the Index are selected from the Parent Index based on three main equally weighted indicators of whether a company is demonstrating high quality characteristics: high percentage of company earnings allocated to shareholders; low levels of debt; and low variability of year on year company earnings. The Index incorporates constraints on the exposure to specific economic sectors to limit significant deviations from the Parent Index.
- ▶ The Parent Index is designed to provide representation of the equity markets in developed countries. Companies are included in the Parent Index based on the proportion of their shares in issue that are available for purchase by international investors.
- ▶ The Fund uses optimising techniques to achieve a similar return to the Index. These techniques may include the strategic selection of certain securities that make up the Index or other securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

For more information on the Fund, Share Class, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Index Methodology Risk: Although the benchmark index aims to seek exposure to securities with high quality characteristics from within the Parent Index, there is no guarantee that this objective will be achieved.
- Factor Focus Risk: Indices with a factor focus are less diversified than their parent index because they have predominant exposure to a single factor rather than the multiple factor exposure of most indices. Therefore they will be more exposed to factor related market movements. Investors should consider this Fund as part of a broader investment strategy.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None*
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Practical Information

- ▶ The depositary of the Fund is State Street Custodial Services (Ireland) Limited.
- ▶ Further information about the Fund and the Share Class can be obtained from the latest annual report and half-yearly reports of iShares IV plc. These documents are available free of charge in English and certain other languages. These can be found, along with other information, such as details of the key underlying investments of the Share Class and share prices, on the iShares website at www.ishares.com or by calling +44 (0)845 357 7000 or from your broker or financial adviser.
- ▶ Investors should note that the tax legislation that applies to the Fund and Share Class may have an impact on the personal tax position of your investment.
- ▶ The Fund is a sub-fund of iShares IV plc, an umbrella structure comprising different sub-funds. The Fund has one or more share classes. This document is specific to the Fund and Share Class stated at the beginning of this document. However, the prospectus, annual and half-yearly reports are prepared for the umbrella.
- ▶ iShares IV plc may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- ▶ The indicative intra-day net asset value of the Share Class is published on relevant stock exchanges websites.
- ▶ Under Irish law, iShares IV plc has segregated liability between its sub-funds (i.e. the Fund's assets will not be used to discharge the liabilities of other sub-funds within iShares IV plc). In addition, the Fund's assets are held separately from the assets of other sub-funds. Assets and liabilities specific to a share class would be attributable to only that share class, however there is no segregation of liabilities between share classes under Irish law.
- ▶ Switching of shares between the Fund and other sub-funds within iShares IV plc is not available to investors. Only Authorised Participants dealing directly with the Fund may switch shares between share classes of the Fund subject to meeting certain conditions in the Fund's prospectus.
- ▶ The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at www.blackrock.com/Remunerationpolicy or on request from the registered office of the Management Company.

**iShares Pacific ex Japan Equity Index Fund
(UK)**

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B849FB47

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE World Asia-Pacific ex-Japan Index, the Fund's benchmark index.
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index.
- ▶ The benchmark index measures the performance of equity securities of leading companies listed in the Asia Pacific region excluding Japan. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the benchmark index.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to the benchmark index.
- ▶ The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

JPMorgan Fund ICVC

ISIN: GB00BKTF1F72

JPM Europe (ex-UK) Research Enhanced Index Equity Fund E - Net Accumulation

a Share Class of JPMorgan Fund ICVC – JPM Europe (ex-UK) Research Enhanced Index Equity Fund. The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objectives, Process and Policies

INVESTMENT OBJECTIVE

To provide capital growth and outperform the FTSE All World Developed Europe ex UK Index (Net) (the "Benchmark") over the long-term (5-10 years), after fees, by investing at least 80% of the Fund's assets in a portfolio of European companies (ex-UK); the risk characteristics of the portfolio of securities held by the Fund will resemble the risk characteristics of the portfolio of securities held in the Benchmark.

INVESTMENT PROCESS

Investment approach

- Uses a fundamental, bottom-up stock selection process.
- Investment process built on stock level analysis by a global research team.
- Diversified portfolio with disciplined, risk-controlled portfolio construction.

Benchmark FTSE All-World Developed Europe ex UK Index (Net)

Benchmark uses and resemblance

- The Fund is actively managed. The Benchmark is a Performance Target and the Fund seeks to provide a return above the Benchmark; however it may underperform its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

POLICIES

Main investment exposure At least 80% of assets invested in equities of companies that are domiciled, or carrying out the main part of their economic activity, in a European country (excluding the UK). The Fund's outperformance relative to the Benchmark is constrained as the risk characteristics of the portfolio of securities held by the Fund resemble the characteristics of the portfolio of securities held in the Benchmark.

Other investment exposures Cash and near cash on an ancillary basis.

Derivatives Used for: efficient portfolio management; hedging. Types: see [Fund Derivative Usage table under How the Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. TRS including CFD: none. Global exposure calculation method: commitment.

Currencies Fund Base Currency: GBP. Currencies of asset denomination: any. Hedging approach: typically managed to the currency weights of the Benchmark.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class will reinvest income.

For an explanation of some of the terms used in this document, please visit the glossary on our website at <https://am.jpmorgan.com/gb/en/asset-management/per/funds/administrative-information/>.

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 6 because its simulated Net Asset Value has shown high fluctuations historically.

OTHER MATERIAL RISKS

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective.

The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Special Situations Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon the I Inc class (ISIN: GB00B57H4F11). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest at least 90% of its assets in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK).
- The Fund will typically invest 90% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus for further details.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk. The Fund is dual priced; it has an offer (buying) price and a bid (selling) price and the difference between these (bid-offer spread) is dependent on the underlying holdings. This means the price investors buying and selling receive is reflective of the underlying transaction costs related to the subscription or redemption to avoid any dilution in the fund's value for existing investors. For a fuller explanation, please visit www.liontrust.co.uk.

Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
 - Intellectual property
 - Strong distribution channels
 - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management and main board directors. Companies are also assessed for employee ownership below the senior management and board and changes in equity ownership are monitored.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund invests in UK & Irish equities. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The Fund is categorised 5 primarily for its exposure to UK equities.
- The SRRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- The Fund is expected to invest in companies predominantly in a single country which maybe subject to greater political, social and economic risks which could result in greater volatility than investments in more broadly diversified funds.
- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund will invest in smaller companies and may invest a small proportion (less than 10%) of the Fund in unlisted securities. There may be liquidity constraints in these securities from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares.

LIONTRUST

COURAGE · POWER · PRIDE

SPECIAL SITUATIONS FUND

- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The fund's investment objective is to target capital growth for investors. Growth stocks tend to pay out lower levels of dividend resulting in lower income yields and may produce more volatile returns than the market as a whole.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Performance fee	None

- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.

- The ongoing charges figure is based on expenses as at 31 December 2023. This figure may vary from year to year. It excludes:

- portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.

- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk or visit the costs and charges page on our website at www.liontrust.co.uk/cost-and-charges.

Past performance

- Past performance does not predict future returns. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 10 November 2005.
- The I Inc share class launch date is 01 November 2010.
- The base currency of the Fund is pounds sterling.

M&G Japan Fund

a sub-fund of M&G Investment Funds (1)
Sterling Class I – Accumulation shares ISIN no. GB00B74CQP79

Managed by M&G Securities Limited

Objective and investment policy

Objective: The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than the MSCI Japan Index over any five-year period.

Core investment: At least 80% of the fund is invested directly in the shares of companies, across any sector and of any size, that are based, or do most of their business, in Japan. The fund is concentrated and usually holds shares in fewer than 50 companies.

Other investments: The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: To reduce risk and costs.

Strategy in brief: The fund manager's focus is on stocks where it is believed that the share price is not fully valuing the company's sustainable earnings. The fund manager applies disciplined and rigorous fundamental analysis during the selection process to ensure a high level of conviction around the valuation for each of the companies held in the fund.

Benchmark: MSCI Japan Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

Additional information can be found on the M&G website, including:

- a glossary providing an explanation of some terms used in this document.
- the Prospectus including the fund's objective and investment policy.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its Net Asset Value has shown high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund holds a small number of investments, and therefore a fall in the value of a single investment may have a greater impact than if it held a larger number of investments.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.51%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge figure shown is an estimate because the fund's discount rate has changed. The fund's annual report for each financial year will include details of the exact charges made. This figure may change from year to year. It excludes portfolio transaction costs.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
- Performance calculation includes UK taxes. It does not take into account the entry and exit charges but does take into account the ongoing charge and the Performance fee, as shown in the charges section.
- The fund launched on 06 April 1971 and the Sterling Class I Accumulation share class launched on 03 August 2012.
- Performance is calculated using Sterling Class I Accumulation shares.
- Benchmark performance has been calculated in GBP.

Practical information

The depositary is NatWest Trustee and Depositary Services Limited.

For more information about this fund, please visit www.mandg.co.uk/literature where you will find a copy of the Prospectus, Instrument of Incorporation and the latest annual or Interim Investment Report and Financial Statements. These documents are in English and are available free of charge. Our website also provides other information such as share prices.

UK tax laws apply to the fund, and this may affect your personal tax position. Please speak to an adviser for more information. M&G Securities Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the fund.

The fund is a sub-fund of M&G Investment Funds (1), an umbrella Open Ended Investment Company (OEIC). The Prospectus, and annual or interim Investment Report and Financial Statements contain information about all of the sub-funds in M&G Investment Funds (1).

The assets of each sub-fund within the umbrella OEIC are segregated by law. This means that the assets belong exclusively to that sub-fund and shall not be used or made available to pay the debts of any other sub-fund or the umbrella OEIC.

You may switch between other sub-funds of M&G Investment Funds (1). An entry charge may apply. Details on switching are provided in the Important Information for Investors document and the fund's Prospectus, or by calling M&G Customer Relations on 0800 390 390.

Other share classes may exist for the fund as set out in the relevant Prospectus. For up-to-date details of the staff remuneration policy that applies to M&G Securities Limited, including a description of how remuneration and benefits are calculated, the make-up of the remuneration committee, and the identities of persons responsible for awarding the remuneration and benefits, please visit www.mandg.co.uk/remuneration. We will provide a paper copy of this information, free of charge, if you require one.

Man GLG Undervalued Assets Fund Professional Accumulation Shares (Class C)

(ISIN:GB00BFH3NC99) Man GLG Undervalued Assets Fund (the 'Fund') is a sub-fund of Man UK ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to outperform (net of fees) the FTSE All Share Total Return Index ("FTSE Index") over the long-term (over 5 year rolling periods). To achieve this objective, the Fund will invest at least 80% of its assets, directly or indirectly, in UK equities relating to companies that either have their registered office in the UK; carry out a predominant proportion of their business activity in the UK market; and/or are listed on a UK stock exchange.
- The Fund may invest in equities which are not UK equities. American Deposit Receipts ('ADR') and other equity linked instruments including (without limitation) exchange traded or "over the counter" (traded via broker-dealer network) financial derivative instruments (as described below) such as stock options, equity swaps and contracts for differences. The Fund may also invest in transferable money market securities (including certificates of deposit, commercial paper and bankers acceptances), fixed and floating rate government and corporate bonds, bonds convertible into common stock, preferred shares and other fixed income investments. Further, the Fund may hold cash, near cash and other ancillary liquid assets such as time deposits and may use currency transactions, including forward currency contracts, currency swaps and foreign currencies to alter the exposure characteristics of the transferable securities held by the Fund. Fixed income investments may be issued by any government, company or international agency.
- The Investment Adviser uses the FTSE Index as a guide for selecting assets for the Fund, however the Fund is actively managed, meaning that the Investment Adviser will use its expertise to pick investments to achieve the Fund's objective. The Investment Adviser seeks to identify companies trading below the Investment Adviser's estimation of the value of their tangible assets (physical and measurable assets that are used in a company's operations such as property, plant, and equipment) or their replacement cost, or whose profit streams (which focuses on the cash generated for shareholders) the Investment Adviser considers to be undervalued.
- *Use of financial derivative instruments ("FDI").* The Fund may use FDI extensively to achieve the investment objective and for efficient portfolio management purposes to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- *Benchmarks.* The Fund is managed with reference to benchmarks. The Fund's performance target (as detailed above) has been chosen on the basis that the ACD considers it to set a reasonable performance target for the Fund to achieve, taking into account a number of factors including (for instance) the investment strategy pursued by the Investment Adviser, and the assets in which the Fund will principally invest. Whilst the Investment Adviser may deviate from the FTSE Index, in terms of holdings selection, the index is used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- *Dealing.* Shares can be bought and sold on each Business Day, as detailed in the Fund prospectus.
- *Investment Horizon:* This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- *Treatment of income.* Income earned on investments will be added to the value of investors' shares.

Risk and reward profile

- The lowest category does not mean 'risk free'.
 - The risk and reward profile is not guaranteed and may change over time.
 - Historical data may not be a reliable indication for the future.
 - The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.
- The following risks may not be fully captured by the risk and reward profile:**
- The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.
 - The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.
 - The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.
 - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
 - The Fund is a specialist country-specific or geographic regional fund, the investment carries greater risk than a more internationally diversified portfolio.
 - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
 - There is no guarantee that the Fund will achieve its investment objective.
- A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.90%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The ongoing charges figure is based on expenses for the year ending 28/02/2023.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

If you switch between different sub-funds of the Company you may pay a switching charge on your subscription to the new sub-fund. This charge may be an amount equal to the entry charge of the new sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

Past performance

- The Fund was authorised in 2013. This share class was launched on 15 November 2013.
- The past performance chart shows the annual performance, calculated in GBP, for each full calendar year since launch.
- The performance in this table includes all fees and expenses, excluding any entry or exit charges, and shows percentage year-on-year changes in Fund value.
- Please be aware that past performance is not a reliable indicator of, or guide to, future performance.
- The Fund is not an index-tracker and does not seek to track the benchmark shown in the past performance chart. The benchmark performance data is shown for performance comparison purposes only.

Practical information

- The Fund is a sub-fund of the Company which is an umbrella scheme comprising a number of sub-funds.
- The Bank of New York Mellon (International) Limited is the depository of the Company. The Fund's assets are treated as being segregated from the assets of other sub-funds of the Company.
- Additional information related to the Fund is located in the prospectus which is produced in an official language of the jurisdictions in which the Fund is registered for public sale. The prospectus is available together with the most recent financial statements, information on other share classes and the latest prices of shares free of charge at www.man.com.
- The Fund is subject to taxation legislation in the UK, which may have an impact on your personal tax position as an investor in the Fund.
- Man Fund Management UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.
- You may switch shares in the Fund for shares in any other sub-fund of the Company. Further information and provisions are in the prospectus.
- Details of Man Fund Management UK Limited's Remuneration Policy are available at www.man.com/mfm-remuneration-policy, including: (a) a description of how remuneration and benefits are calculated; and (b) the identity of persons responsible for awarding remuneration and benefits. Premier Miton European Opportunities Fund (the "Fund") – Class B Shares

A sub-fund of Premier Miton Investment Funds 3 (the "Company")

Class B Accumulation Shares, ISIN no.GB00BZ2K2M84 (representative share class) & Class B Income Shares, ISIN no.GB00BMCC2016

Authorised Corporate Director ("ACD") - Premier Portfolio Managers Ltd.

Objectives and investment policy

To provide total returns, comprised of income and capital growth, over the long-term, being five years or more. Five years is also the minimum recommended period for holding shares in this fund. This does not mean that the fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

A minimum of 80% of the fund's assets will be invested in shares of companies listed in Europe, excluding the UK.

The fund is actively managed which means that the fund manager will manage and adapt the portfolio depending on their assessment of the broad economic environment and market conditions.

The fund manager may invest in large, medium and smaller sized companies across all industry sectors although it is expected that there will be a bias towards medium sized companies, which the fund manager considers to be of a market value of between £2 billion and £15 billion. The exposure to different sized companies may change over time according to economic and stock market conditions.

The fund may also hold other investments such as companies in other geographical jurisdictions such as the UK and the USA, government and corporate (company) bonds, convertible bonds (bonds that can convert into company shares), collective investment schemes and cash and cash-like investments.

The fund may invest in derivatives and forward transactions (these are contracts whose value is based on the change in price of an underlying investment) for the purposes of efficient portfolio management, including hedging (hedging is designed to offset the risk of another investment falling in price).

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Accumulation shares: any income made by the Fund will be reinvested to grow the value of your investment.

Income shares: any income made by the Fund will be paid out to you.

Derivatives: this is a financial contract whose value is related to the value of an underlying asset or index, often used with the aim of managing risk or enhancing returns.

Bonds: Issued by companies or governments and similar to a loan in nature, usually paying a fixed or variable interest rate.

Corporate bonds: Issued by companies and similar to a loan in nature, usually paying a fixed rate of interest.

Convertible bonds: a type of bond that the holder can convert into shares of the issuing company in certain circumstances.

Efficient portfolio management: managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth.

Hedge: an investment which aims to reduce the risk of adverse price movements in an asset or group of assets.

Forward transactions: a type of derivative between two parties to buy or sell an asset at a specified price and time in the future.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← | | | | | | | → Typically higher rewards, higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is ranked as 6 because it has experienced relatively high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The Fund holds a wide range of capitalisations in equities concentrated by geography across Europe and can include the UK. Equities, as an asset class, tend to experience higher volatility than many other asset types such as bonds or money market instruments. Funds concentrated in one geographic area can be vulnerable to market sentiment in that specific area and can carry a higher risk. The fund will hold securities denominated in foreign currencies adding to both risk and the possibility of gain. Funds with higher price volatility are structured to generate higher returns but at the risk of larger potential losses.

The indicator may not take fully into account the following risks of investing in this fund:

- **Liquidity risk:** during difficult market conditions some securities, such as equities issued by mid capitalisation companies, may become more difficult to sell at a desired price.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

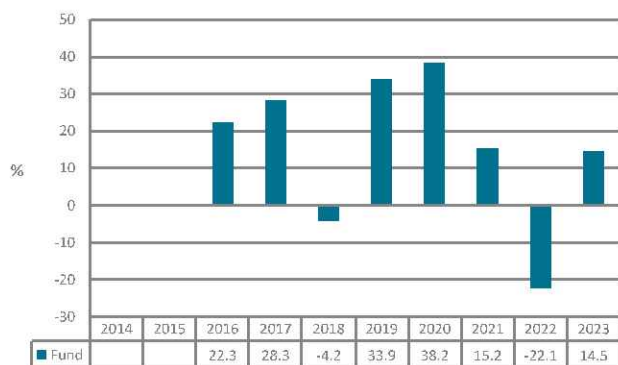

Charges

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	7.00%

Funds holding smaller capitalisation assets can carry a higher risk including liquidity risk than funds holding more large capitalisation assets. Funds with higher price volatility are structured to generate higher returns but at the risk of larger potential losses.

The indicator may not take fully into account the following risks of investing in this fund:

- Liquidity Risk:** during difficult market conditions some securities, such as equities issued by smaller capitalisation companies, may become more difficult to sell at a desired price.
- Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the Fund over a year	
Ongoing charges	0.83%
Charges taken from the Fund under specific conditions	
Performance fee	NONE

- Switching charge (for switching into the Fund from another fund) 0.00%.
- The ongoing charges figure ("OCF") is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are units/shares of another fund).
- For more information about charges, please refer to the Fund's prospectus.
- For the Ongoing Charge, the figure was calculated as at 31/05/2023.

Past performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 01/03/2013
- Share/unit class launch date: 01/03/2013.
- Performance is calculated in GBP.
- Performance is net of charges (excluding entry charge) and net of tax.

Royal London Sustainable Leaders Trust (Accumulation - Class C Shares)

ISIN: GB00B7V23Z99

Managed by RLUM Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve capital growth over the medium term (3-5 years) by investing at least 80% in the shares of UK companies listed on the London Stock Exchange that are deemed to make a positive contribution to society. Investments in the Fund will adhere to the Investment Adviser's ethical and sustainable investment policy.

The Fund's performance target is to outperform, after the deduction of charges, the FTSE All-Share Index (the "Index") over a rolling 5-year period. For further information on the Fund's index, please refer to the Prospectus. The Fund is actively managed.

Policy At least 80% of the Fund will be invested in shares of UK companies which are listed on the London Stock Exchange.

Where the manager believes it is in the best interests of the Fund, they may invest up to 20% of the Fund's assets in shares of overseas companies. The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social & governance (ESG) management, alongside financial analysis. For further details of the Investment Adviser's ethical and sustainable investment policy please refer to the Prospectus. Investors can view the current policy at <https://www.royallondon.com/existing-customers/yourproducts/manage-your-isa-or-unit-trust/rlum-isa-overview/>.

The Fund may invest up to 10% in other investment funds, known as collective investment schemes. Typically only a small portion of assets will be invested in cash.

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for efficient portfolio management (EPM).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within five years. You should aim to keep your units for at least five years, although you can sell them at any time.

Concepts to understand

Capital Growth The rise in an investment's value over time.

5-Year Rolling Period Any period of five years, no matter which day you start on.

Environmental, social and governance A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The fund is shown in risk category 6 because its unit price has shown a high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds.

The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. This Fund has historically been primarily invested in shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category. The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Concentration risk The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Responsible Investment Risk The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge	None
Exit charge	None

Charges taken from the fund over a year:

Ongoing charge	0.76%
----------------	-------

Charges taken from the fund under specific conditions:

Performance fee	None
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses as at 31 December 2023.

This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 29 May 1990 and the share class on 4 December 2012.

Sanlam Global Artificial Intelligence Fund – Class I GBP Base Acc
 a Sub-Fund of MLC Global Multi Strategy UCITS Funds Plc (the “Company”)
 Sanlam Asset Management (Ireland) Limited IE0001KG3JC0

Objectives and Investment Policy

Objectives and Investment Policy

Investment objective

The investment objective of Sanlam Global Artificial Intelligence Fund (the “Fund”) is to achieve capital appreciation.

Investment Policy

The Fund is actively managed and invests in equities and equity securities (such as preferred stocks and depositary receipts) of companies worldwide engaged in the development and/or production of artificially intelligent (“AI”) systems (such as smart applications on phones) or products (such as sensing technology) which enable third party entities (such as online retailers, online auction houses or online travel agencies) to sell or deliver their products and services through an online platform, and, companies which produce, develop or deliver products and/or services that have an artificially intelligent component which can enhance an existing product or service (such as artificially intelligent technologies that are embedded in insurance applications to provide more accurate underwriting standards and rates).

Securities invested in by the Fund will primarily be listed or traded on stock exchanges or markets as set out in Appendix IV of the Prospectus. However, up to 10% of the Fund’s Net Asset Value may be invested in unlisted or non-traded securities.

The Fund may also invest in other collective investment schemes (“CIS”), including ETFs, which invest in companies as described above, and money market funds, for cash management purposes. Where considered appropriate to the investment objective, the Fund may retain amounts in cash, cash equivalents and money market instruments (including, but not limited to, cash deposits, commercial paper, certificates of deposit and treasury bills).

The Fund may from time to time be solely invested in cash or ancillary liquid assets at certain times such as:

- where the Investment Manager considers that there are no sufficient suitable investment opportunities;
- to protect the value of the Fund and maintain liquidity at times in falling or volatile markets;
- to facilitate the Fund’s ability to meet redemption requests; and

- where the Fund has received subscriptions that are awaiting investment.

The Fund may use financial derivative instruments (“FDI”) for efficient portfolio management and hedging purposes to protect against market or currency movements, to reduce costs, or to earn income or capital.

Further information on sustainability factors that may be relevant to this Fund can be found in the prospectus or on our website at www.sanlam.ie.

You can sell your shares in the Fund any day (except Saturday or Sunday) that banks are open in Ireland and the UK.

The Company does not declare a dividend in relation to your shares and therefore any income that your shares may earn will be retained within the Fund and the value of shares will rise accordingly.

The Fund does not track a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

Recommendation: The Fund is suitable for investors specifically seeking exposure to companies that are leaders in or beneficiaries of artificial intelligence. The Fund is designed for investors who understand and are willing to take the risks involved in investing in this Fund and who are able to take the risk of losing part or all of their investment.

Risk and Reward Profile

The Fund is in category 6 as it invests in securities that can vary significantly in price from day to day due to a variety of factors. Therefore the chance to make large gains means the risk of suffering large losses.

A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making higher gains.

The seven-category scale is complex. For example, a category 2 fund is not twice as risky as a category 1 fund. The category is based upon the annual calculation of the Fund’s risk calculation relevant to the nature of the types of instruments the Fund invests in. The risk category shown is not guaranteed and may change over time.

Investing in the shares of companies focused on the AI industry is sensitive to risks such as small or limited markets for such securities, changes in business cycles, slow downs in world economic growth and/or technological progress, rapid obsolescence, and government regulation.

Shares of AI focused FDI companies can also be more volatile than securities of companies that do not rely heavily on such technology.

The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested.

The Fund may hold securities through a depository security and receipt. The currency of a depository receipt may be different to the currency of the non-local corporation to which it relates. The value of a depository receipt will not be equal to the value of the underlying non-local securities as a result of a number of factors. These factors include the fees and expenses associated with holding a depository receipt, the currency exchange relating to the conversion of foreign dividends etc.

It may be difficult for the Fund in extreme market conditions to redeem its shares from a CIS at short notice without suffering a loss. Investing in a CIS may lead to payment by the Fund of additional fees and expenses in relation to those CIS.

Certain securities may be difficult or impossible to sell at the time and the price that the seller would like. The seller may have to lower the price to effect a secondary market sale or sell other securities instead or forego an investment opportunity.

The Fund may use FDI for efficient portfolio management and hedging. It may be that the use of FDI causes losses to the Fund.

For a more detailed explanation of risks, please refer to the “Risk Factors” section of the prospectus and the supplement of the Fund.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the Sub-Fund over a year	
Ongoing charge	0.60%
Charges taken from the fund under certain specific conditions	
Performance fee	None

Any entry charge shown is a maximum figure. Where charges are shown in some cases you might pay less; you can find this out from your financial advisor or distributor.

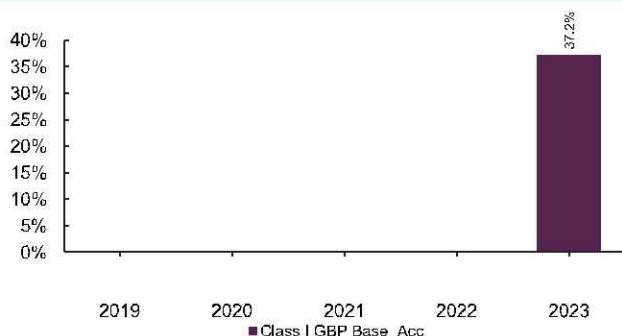

The ongoing charge is based on the expenses for the previous 12 month period ending December 2023. This figure, which excludes portfolio transaction costs, may vary from year to year.

A dilution levy may be charged on a purchase or sale of shares in the Fund in some cases. It may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price. Any dilution levy charged will be paid into the Fund.

The Fund's annual report for each financial year will include detail on the exact charges made.

You can find out more details about the charges including performance fees and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at www.sanlam.ie.

Past Performance

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs, excluding entry and exit charges.

The performance of this class is calculated in British Pounds.

The Fund launched on 29 July 2022. This class started to issue shares on 29 July 2022.

Schroder Global Recovery Fund

a sub-fund of Schroder Investment Fund Company

Class S Income GBP (GB00BD3WZ319)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI World (Net Total Return) Index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of companies worldwide which are considered to be undervalued relative to their long term earnings potential.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of companies worldwide that have suffered a set back in either share price or profitability, but where long term prospects are believed to be good.

The fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the Investment Manager believes are significantly undervalued relative to their long-term earnings potential.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective

investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivative instruments for investment purposes as well as for efficient portfolio management.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net Total Return) Index, and compared against the MSCI World Value (Net Total Return) Index and the Investment Association Global sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class pays income received from the fund's investments to you annually.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may

become more difficult to achieve.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Charges

One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 0.57%

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2023 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail share classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this share class of the fund is 0.57%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 30/10/2015.

The shareclass was launched on 28/11/2016.

Performance figures are only available since the launch of the respective share class.

Please note that the fund's objective and benchmarks were changed on 31 March 2021. The past performance in the above table is based on the fund's objective and benchmarks (No target benchmark. Comparator benchmarks: MSCI World (Net Total Return) Index and the Investment Association Global Equity Income sector average return) in place prior to this date. Going forward, this table will show past performance from this date based on the new objective and benchmarks (Target benchmark: MSCI World (Net Total Return) Index. The policy includes a description of how remuneration and benefits are calculated & the identities of persons responsible for awarding the remuneration and benefits.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmarks have been selected because the Investment Adviser and the ACD believe that these benchmarks are suitable comparisons for performance purposes given the Fund's investment objective and policy.

Vanguard FTSE U.K. Equity Income Index Fund (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Acc

ISIN: GB00B59G4H82

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE U.K. Equity Income Index (the "Index").
- The Index consists of common shares of companies listed on the London Stock Exchange's main market, that are expected to pay dividends that generally are higher than average.
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to:
 1. Track the performance of the Index by investing in all constituent shares of the Index in the same proportion as the Index.
 2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other

than the share class currency. Movements in currency exchange rates can affect the return of investments.

- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-Investments-Funds-ICVC.pdf>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. Any charges to the investor will be taken from capital, not income. This may increase the level of income paid but will result in capital erosion and will constrain growth.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.14%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor and or adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2023. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled "Buying Shares", "Redeeming Shares", "Charges and Expenses", "Dilution Adjustment" and Appendix 1 of the Prospectus on our website at <https://global.vanguard.com>
